How It Works

1. **Every square with a number gets the color with that number. The key on the facing page lists the colors for that picture.**
2. **The numbers are the same in the whole book: 30 is always Black. Write the numbers on your pencils or pens once and you are set.**
3. **Squares with no number stay white.**
4. **Work one color at a time, or one row at a time. You will not know what it is until the very end.**

Tips

- Colored pencils, fine felt tips and gel pens all work. Put a sheet of paper behind the page if you use markers.
- A ruler or a strip of paper under the row you are working on keeps your place.
- Each picture is printed on its own sheet, so nothing bleeds into another picture.
- Peeking is allowed: every finished picture is at the back of the book.

Your Color Chart

These 30 colors make every picture in this book, and each number means the same color on every page. Color each box with the pencil or pen you will use for it. Close is fine: they do not need to match exactly.

- Color the test box next to each number first, so you know how it looks.
- Squares with no number stay white.
- Work one color at a time, or one row at a time. The picture stays a mystery until the end.
