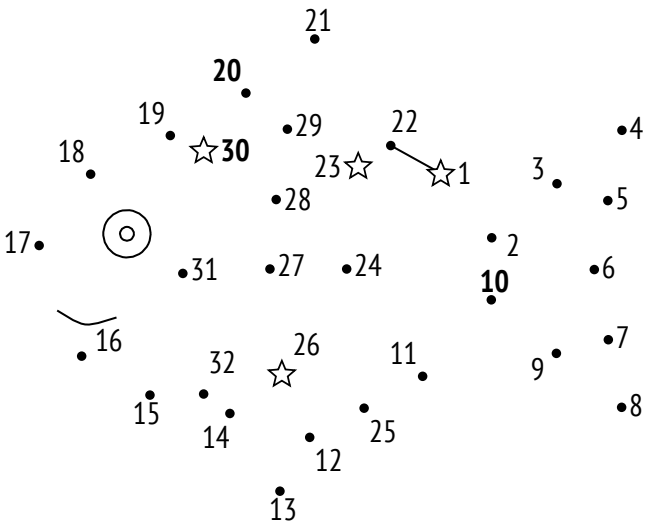
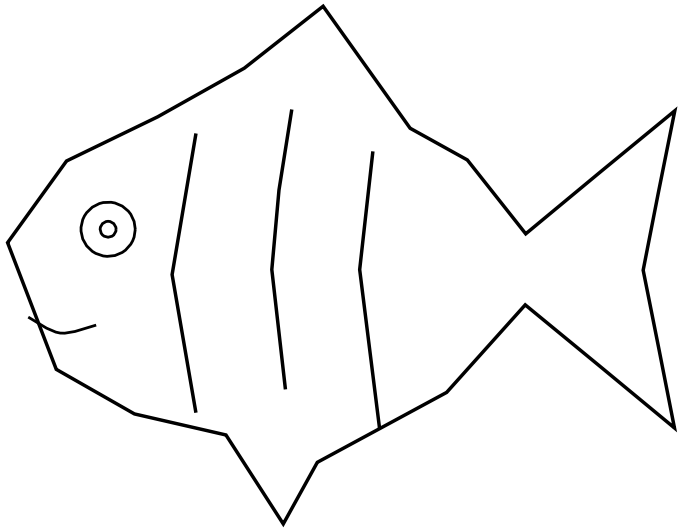
How to Solve

- ✓ Start at the star next to number 1 and draw a straight line to dot 2, then to dot 3, and so on, always to the next number.
- ✓ Each number belongs to the dot it sits closest to. No number ever touches another dot or a line of the finished picture.
- ✓ A hollow star marks the start of a new line. When the next number sits at a star, lift your pen and start again there: never draw a line into a star.
- ✓ Short solid lines are already printed for you: they close a loop back to its star, or they are small details too tiny to carry dots.





The puzzle **The finished picture**

Every puzzle has a matching finished picture at the back of the book, starting on page 93.

Tips for Big Puzzles

- ✓ Use a fine pen or a sharp pencil and a good light. A ruler helps on long straight lines, but freehand is fine.
- ✓ Every tenth number (10, 20, 30...) is printed in bold. They are easy landmarks: find the next bold number and you know the area to search.
- ✓ Lost the next number? It is never far away: lines join neighboring dots, so look around the dot you just reached.
- ✓ Cross out or tick each number as you pass it. It keeps your place when you put the book down.
- ✓ Not sure what you are drawing? That is half the fun. The finished pictures are at the back if you want a peek.
