Large Print Variety Puzzle Book for Seniors: 100 Puzzles with Answers: Word Search, Sudoku, Crosswords, Word Scrambles, Cryptograms and More

Copyright © 2026 Harper Lane. All rights reserved.

No part of this book may be reproduced or transmitted in any form or by any means without written permission from the publisher, except for brief quotations in a review. You may copy a puzzle for your own personal use.

All 100 puzzles in this book are original and were checked by computer: every sudoku, logic puzzle, picture puzzle, fill-in and cryptogram has exactly one solution, and every word in every search appears exactly once.

First edition, 2026

Welcome

This book has 100 puzzles: 24 Word Searches, 16 Sudoku, 10 Word Scrambles, 10 Cryptograms, 10 Number Fill-Ins, 8 Crosswords, 8 Number Searches, 8 Picture Logic Puzzles and 6 Logic Puzzles.

The different kinds take turns, so every page brings something new. Each kind starts easy and gets a little harder as you go. The "How to Play" pages at the front show every kind with a solved example.

The stars at the top of each page show how challenging a puzzle is: one star is easy, three stars is a good stretch. Skip around as you like.

Every answer is at the back of the book, starting on page 131, grouped by kind. Each puzzle page tells you exactly which page its answer is on.

A pencil with an eraser works best. Pens and markers may show through the paper.

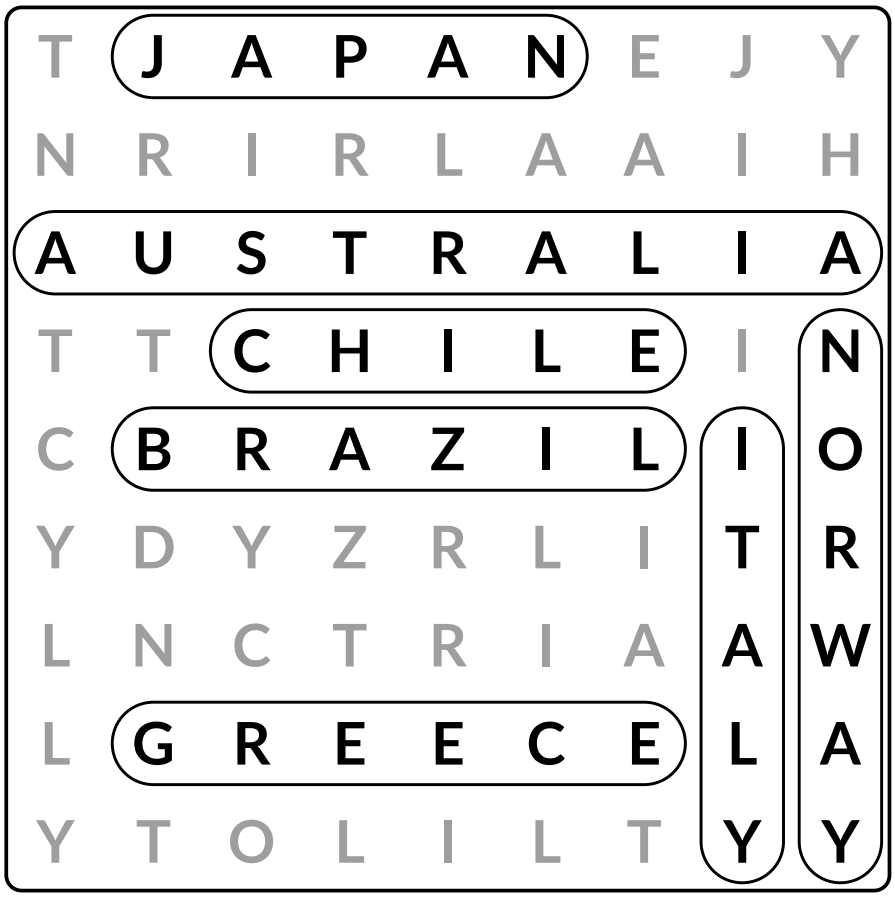
How to Play: Word Search

Each word in the list is hidden in the grid of letters. Find it, circle it, and check it off the list.

Words can cross and share a letter. Start with long words or words with unusual letters like Z, Q or K.

A solved example



Sample pages

How to Play: Crossword

Each numbered clue gives you a word. Write it in the grid from the square with the same number: Across answers go left to right, Down answers go top to bottom.

Answers that cross share a letter, so every word you solve helps with the others. Fill in the easy ones first.

A solved example

L	E	D	■	A	R	M	■	F	A	D
E	A	R	■	C	I	A	■	L	I	E
A	G	O	■	H	O	S	T	E	S	S
D	E	N	S	E	■	C	H	A	L	K
■	R	E	P	■	H	O	R	S	E	S
■	■	■	R	O	U	T	E	■	■	■
A	C	T	I	N	G	■	A	S	H	■
T	A	U	N	T	■	O	T	H	E	R
L	I	S	T	I	N	G	■	O	R	E
A	R	K	■	M	A	R	■	R	O	N
S	O	S	■	E	Y	E	■	T	N	T

Sample pages

How to Play: Sudoku

Write a number in every empty square so that each row, each column and each outlined box holds every number exactly once.

Look for a row, column or box that is nearly full: the missing number is easy to spot. Use a pencil so you can rub out a guess.

A solved example

2	3	4	1
1	4	2	3
3	2	1	4
4	1	3	2

Sample pages

How to Play: Word Scramble

Each row is a word with its letters mixed up. Rearrange the letters to find the word and write it in the boxes.

Every word belongs to the theme at the top of the page. Say the letters out loud or try common endings like ING, ER or LY.

An example

1. M U I A — M | | | |
2. C U A B — C | | | |
3. F J I I — F | | | |

Answer: **1. MAUI** **2. CUBA** **3. FIJI**

Sample pages

How to Play: Cryptogram

A quote is written in code: every letter has been swapped for another letter, the same way all through the puzzle. A few letters are given to start you off.

Fill those in everywhere they appear, then look for short words: a one-letter word is A or I, and a common three-letter word is often THE or AND. Use the code tracker to keep notes.

An example

N	A	M	E		T	H	E
P	Q	Z	T		J	K	T

	R	E	A	T	E	S	T				A	L	L
A	E	T	Q	J	T	U	J		D	H	Q	X	X

T	H	E			N		E	N	T		R	S	.
J	K	T		R	P	L	T	P	J	D	E	U	

A					E	N	T	.
Q	G	G	R	M	T	P	J	

Mark Twain

Answer: Name the greatest of all the inventors. Accident. (Mark Twain)

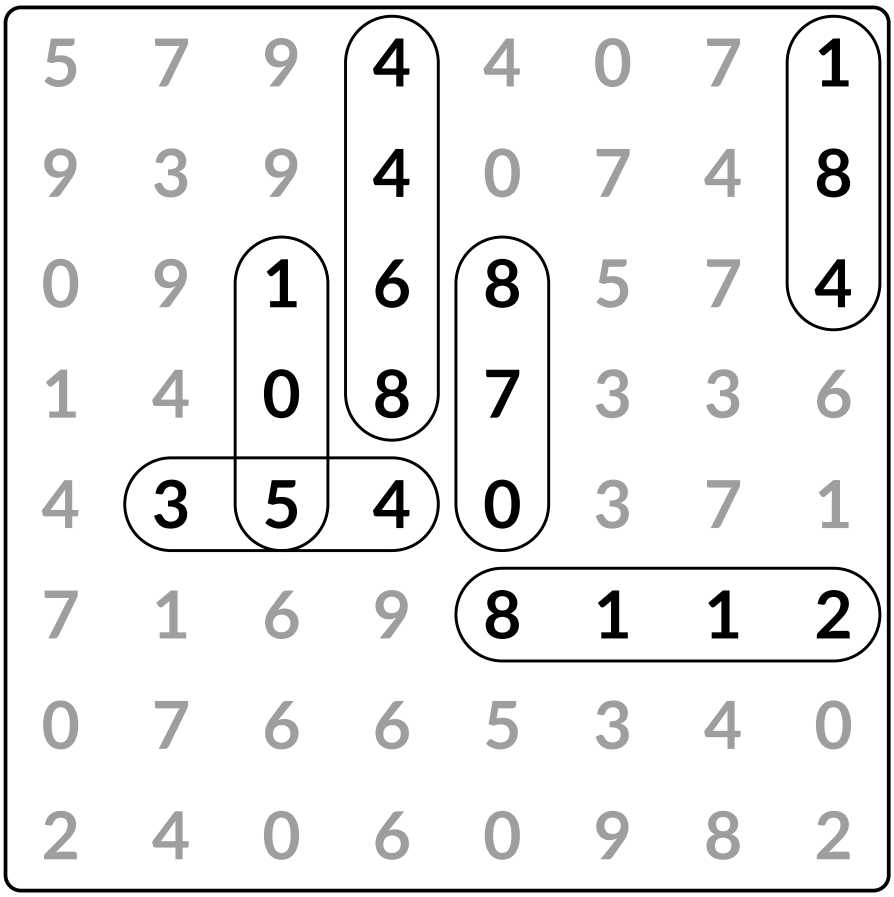
Sample pages

How to Play: Number Search

Like a word search, but with numbers. Each number in the list is hidden once in the grid. Find it and circle it.

Look for the first two digits together, then follow the line to check the rest of the number.

A solved example



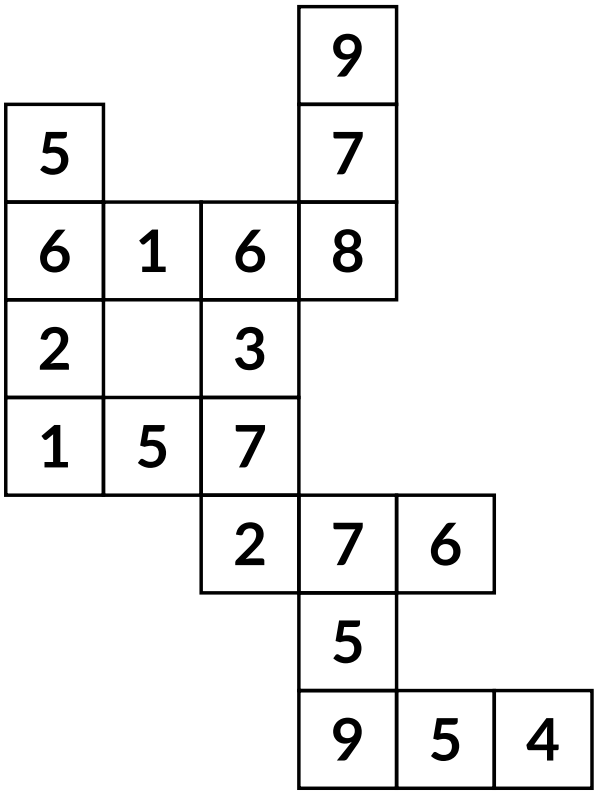
Sample pages

How to Play: Number Fill-In

Every number in the list fits in the grid exactly once, across or down. Start from the number already in place: the numbers that cross it must share its digits.

Group the list by length (it is printed that way) and look for the lengths with only one or two numbers first.

A solved example



Sample pages

How to Play: Logic Puzzle

Each clue is a fact. Put an X in the grid where a clue rules a pairing out, and a dot where it proves a match. Once a row has a dot, every other square in that row and column of the same box gets an X.

Facts carry across: if Ann has the cat and the cat owner lives at number 5, Ann lives at number 5. Write the final answers in the table under the clues.

The answer to an example puzzle

Agnieszka, $8 a jar, 4 hives
Bongani, $9 a jar, 6 hives
Greta, $7 a jar, 5 hives

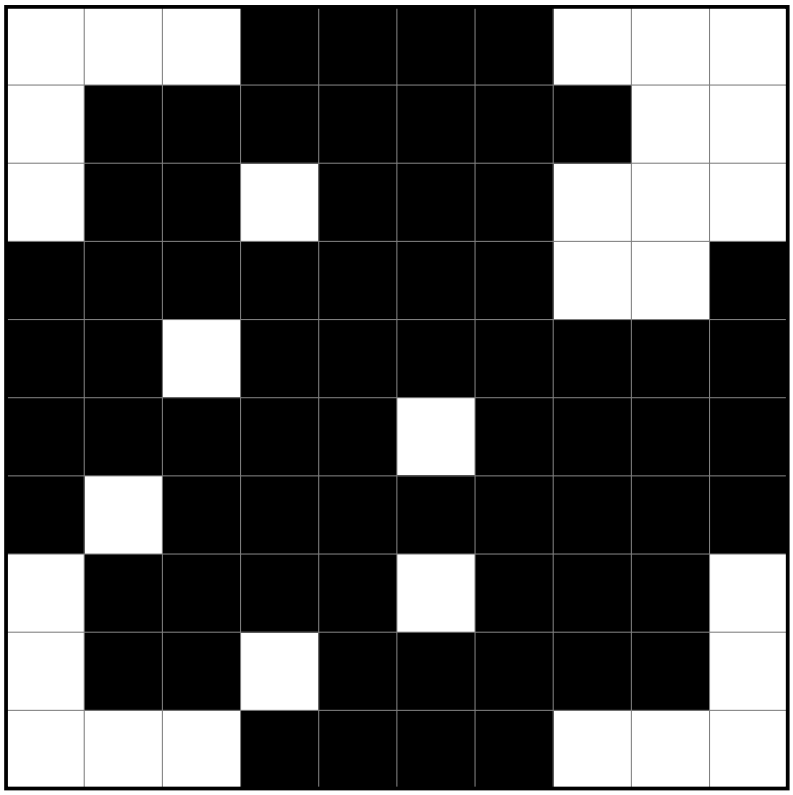
Sample pages

How to Play: Picture Logic

Each number is a group of shaded squares in that row or column, in the same order. "3 1" means three shaded squares together, then at least one blank, then one more.

Start with the big numbers: in a row of 10, a group of 8 always covers the middle 6 squares. Put a small X in squares you know are blank.

A solved example



Cookie
